

Cannabis Investments - The Latest Industrial Revolution

INDICA CAPITAL GROUP, LLC
Investing In A Greener Future

Astonishing economic opportunities are emerging as cannabis moves mainstream. Roughly 30 years after the internet revolution and 50 years after the software revolution, the world is now on the verge of a green industrial revolution. With the 2018 Farm Bill allowing for the production of industrial hemp across the country, Georgia has joined other states and opened the opportunity for private businesses to grow in the cannabis field.

Please join **Indica Capital Group**, **Smith Gambrell & Russell** and **Cherry Bekaert** in an educational symposium with panel discussions that explore investment opportunities and the impact across the Southeast.

Wednesday, June 26

4:00 - 7:00 p.m.

Hear from cannabis industry experts on the following topics and more:

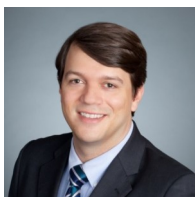

- Legal regulations in GA and nationally
- Business and industrial applications
- Legal and environmental considerations
- Accounting and tax considerations
- Medical impacts and value add
